

DZQ-500/2SA Industrial Double Chamber Vacuum Sealer

The double-chamber vacuum packaging machine adds an extra chamber on the basis of the single-chamber vacuum packaging machine, which greatly improves the working efficiency of the machine. This machine has 4 sealing strips of 500mm and is a medium-sized machine. It is very suitable for use in small and medium-sized factories, large supermarkets, slaughterhouses and other places that require high efficiency.

Product Description

Advantage

- **Durable Stainless Steel Construction:** This vacuum packaging machine features a high-quality stainless steel casing that offers exceptional strength and durability. This construction ensures the machine remains stable and reliable even with frequent use, while effectively protecting it from physical damage.
- **Adjustable Sealing Width:** The device features an adjustable sealing bar, allowing for precise control over the sealing width. This flexibility ensures a tight and consistent seal, which is crucial for maintaining the quality and extending the shelf life of packaged goods.
- **Customizable Operation:** Operators can easily adjust the temperature and sealing time settings to suit different packaging materials. This customization capability ensures optimal sealing performance across a range of applications.
- **Versatile Material Compatibility:** Suitable for sealing a wide array of materials, including plastic films, aluminum foil pouches, and composite bags. This versatility makes the machine a valuable tool for handling various packaging requirements.
- **Compact and Space-Efficient:** Despite its robust build, the commercial vacuum packaging machine is designed to be compact, making it a practical choice for limited workspace environments. Its efficient design allows for easy integration into different production setups without occupying excessive space.

Technical Parameters

Model	DZQ-500/2SA
Voltage	110/220/380V 50-60Hz
Pump Power	1.8kw
Pump Capacity	20m ³ /h (x2) /Option
Sealing Length	500mm (x4)
Sealing Width	10mm
Chamber Size	565x535x50mm(without cover)
Dimension	1254x680x995mm
Weight	≈175kgs
Certification	CE ISO
