

## *MIC 18-4 Oil Filling Machine*

The Oil Filling Machine boasts exceptional characteristics meticulously engineered for efficiency and precision. Constructed from high-quality materials, often stainless steel, it ensures durability while adhering to the stringent hygiene standards for food-grade applications. Equipped with automated bottle feeding, precise filling, and capping mechanisms, the machine embodies a seamless fusion of speed and accuracy in oil production. User-friendly interfaces featuring programmable controls accommodate various bottle sizes and oil viscosities, ensuring each product receives a consistent and precise fill. Anti-drip features and customizable settings preserve the quality of oil formulations, delivering products that resonate with both efficiency and the promise of superior taste.

### **Product Applications:**

The applications of the Oil Filling Machine span the entire spectrum of oil manufacturing, providing a comprehensive solution for efficient and automated filling. Whether producing standard cooking oils, olive oils, or specialized blends, this machine ensures uniformity in dosage and presentation. Its adaptability caters to the dynamic requirements of the food industry, where each oil variant requires a tailored approach to dispensing, capping, and preserving its unique flavor profile.

## Parameters

Power	1.5Kw
Filling heads	18heads
Capping heads	4heads
Filling volume range	3-5L
Production capacity	1800-2200BPH based on 5L
Filling temperature	Room temperature
Bottle diameter range	Φ80-180MM
Bottle height	180-380MM
Air pressure	0.6-0.8Mpa
Air consumption	0.8-1.0m <sup>3</sup> /min
Dimension	2570×2300×2650mmm
Weight	5000Kg
