

## *FRD-1200V Continuous 15kg Plastic Bag Heat Sealing Machine*

This heavy duty bag sealing machine is to seal the container filled with packaging, after the product is loaded into the packaging container, in order to make the product sealed and preserved, maintain the quality of the product, to avoid the loss of the product, it is necessary to seal the packaging container, this operation is completed on the sealing machine.

### **Products Description**

1. This sealing machine adopts the transmission mechanism of electronic constant temperature control and stepless speed regulation, which can seal plastic packaging bags of various materials
2. The electrical control of this machine is simple, and the reasonable and refined mechanical transmission makes the structure and performance very stable, the failure rate is extremely low, and the service life is longer. It can work continuously for a long time and can meet the needs of mass production.
3. After the product is sealed and packaged by this machine, it has a beautiful appearance, clean, dust-proof, moisture-proof, damage-proof, and is easy to carry and store. Greatly reduce product loss, and has the advantage of packaging cost.
4. As the machine is small in size, widely used, and the sealing length is not limited, it can be used in conjunction with various packaging lines. It is the best sealing equipment for batch product packaging in factories and shops.

## Product Specification

Model	FRD-1200V continuous 15kg plastic bag heat sealing machine
Voltage	110/220V 50/60HZ
Power	1355W
Sealing speed	0-12m/min
Sealing width	6-12mm
Max sealing height	600mm
Min sealing height	80mm
Temp range	0-300°C
Printing way	solid-ink
Max. conveyor loading	15kg
Conveyor belt width	20cm
Conveyor length	136cm
Weight	45kg
Size	1371*580*1228mm
