

SH-AFC11 Automatic Monoblock Roll-on Bottle Deodorant Roller Ball Bottle Perfume Oil Vial Filling Capping Machine For Perfume Oil

A roller bottle filling machine is a device used to fill essential oil roller bottles with precision. It makes the process quick, efficient and accurate. To fill the bottles, place them on the machine's conveyor, set the fill volume, the machine will dispense the oil and press the roller cap. The machine helps increase productivity and ensures consistent filling of essential oils, deodorant, perfume oil.

Main Feature

- ▶ Can fill liquid, feed roll-on balls and bottle cover, cap bottles at one machine, saving working space.
- ▶ Equipped with 316 stainless steel magnetic pumps, it can fill liquid accurately.
- ▶ It can work with labeling machine to realize automated production.

Parameter

- Machine Model: SH-AFC11
- Voltage: 220V/110V 50-60Hz
- Power: 2500W
- Filling Pump: 316 Stainless Steel Magnetic Pump
- Working Speed: 25-30 bottles/min (depending on bottle size and liquid)
- Max Flow Rate: 4L/min*2 (based on water)
- Suitable Bottle Size: Customized
- Bottle Cap Diameter: Customized
- Package Size: About 2040*1660*1650mm
- Package Weight: About 535kg
