

DF-BS Tabletop Semi Automatic Powder Filling Machine

The DF-BS is a compact and versatile packing solution designed for fine powders such as flour, milk powder, match powder, and other food-grade materials. With a packaging range of 5–300g, it perfectly meets the needs of small to medium production batches.

Featuring a precise quantitative filling system controlled by an intuitive PLC touchscreen, the DF-BS delivers high accuracy and consistent dosing in a user-friendly interface. Its built-in small conveyor belt supports smooth and consistent material transfer, improving efficiency and reducing manual work.

Constructed from durable stainless steel, the machine is easy to clean and maintain, making it ideal for industries with strict hygiene requirements. Thanks to its space-saving design, it fits easily into small factories, workshops, and startups with limited floor space.

The DF-BS also offers customization options to handle different powder types, packaging sizes, and special production needs—helping your business stay flexible and competitive.

Technical Parameters

Model	DF-BS
Power	AC220V/50Hz 700W
Filling Accuracy	±1%
Packaging Speed	1500-2500 bags/hour
Packaging Specification	0.5-1000g (change screw)
Filling Head	1
Net Weight	135kg
