

FWM500 Horizontal Flow Wrapper

FWM500 Horizontal Flow Wrapper is applicable to wrapping the solid goods with regular shape, such as Biscuit, Chocolate, long shape candy, Bread, Instant noodles, waster ice, ice cream, Moon cake, medicine, Commodity, knife and fork, Hardware etc. Machine has a speed of 0 to 200 wraps per minute although this machine is usually hand fed and runs at lower speeds the machine can be fitted with various automatic feeds, such as conveyor infeed, magazine feed, vibration bowl feed, auto push feed and cross belt feed etc.

Function:

- Full servo operated wrapper. Three servo motors drive the conveyor feeding, film feeding and bag sealing
- Three Servo Motors and Touch Screen constitute the control and drive core, which greatly improves the control precision, speed range, reliability and intelligence of the whole machine; The locking of the cutting length, sealing temperature and other parameters is more precise
- Bafu's sealing technology for superior seal integrity and package quality
- Cantilever construction that provides for easy cleaning and maintenance, with easy access to mechanical and electrical components
- High accuracy photoelectric tracking system. Adopt high quality Encoder and the first bag will be tracked
- Special designed Bag Forming Device can be fast adjusted to fit different sizes of different products
- No Product No bag function

Standard Specifications:

- Speed: up to 200packs/Min
- Size (mm): 90-460mm
- Voltage: 220V, 50Hz
- Total Power: 3.0KW
- Dimensions: 3800x1150x1500mm
- Machine Weight: 1000 kg
- Wrapping Material: CPP/PET CPP/BOPP
