

SED-270TP-B Automatic Tropical Aluminum Tablet Blister Packing Machine

Based on the SED-270TP-B blister packing machine, this equipment features additional tropical aluminum forming and sealing stations. This enhancement improves sealing effectiveness while boosting moisture resistance and light protection capabilities, significantly elevating product quality. Ideal for pharmaceutical, medical, food, and nutraceutical packaging applications.

Features

- Fast mold change capability
- Lathe-style adjustment design
- Siemens brand main electrical components
- Easy-to-clean structure design
- Rear-mounted main motor and mechanical rotating mechanism
- Operating and rotating partition
- Standard servo motor traction
- PVC feeding device with active discharge motor
- Split design of front and rear machine sections

Technical Specifications

- Punch frequency: 10-35 circles/minute
- Max. capacity: 140 blisters/minute (standard 80×57mm, 4 blisters/circle)
- Forming area: Max.: 260×110(mm²)
- Blister specification: Standard: 80×57mm
- Reference specifications: 80×57, 95×65, 103×43, 120×43
- Dimension: 5360mm × 850mm × 1750mm
- Weight: 4000kg
