

SED-118SP Perfume Packing Plastic Ampoule Filling And Sealing Machine

This is the most advanced Suppository Filling and Sealing Machine in China. The machine is suitable for any kinds of material, such as PVC laminated by PE, PVC laminated by LDPE. It can be filled by Liquid, Honey, Semi Liquid, etc.

This machine is PLC Control and adopts easy changeable Button Panel for operating. The machine is stepless running, one minute for 1-50cutting. It is Suitable for Pharmacy Factory, Hospital, Lad, etc.

Feature

- Controlled by PLC, the frequency conversion in finitely variable speed.
- All the process such as spreading roll, ampoule bottle forming, filling, sealing, printing serial numbers, cutting, etc are controlled by programming.
- The filling head doesn't drop, leak, produce bubbles and spill over
- Meet GMP Standard

Product Parameters

Max Forming Depth	12mm
Cutting Frequency	0-25 times
Packaging Material	PVC/PE(0.2-0.4)*120mm
Capacity volume	1-20ml
Total Power	4.5kw
Voltage	220V-380V/50HZ
Weight	750kgs
Dimension	2300*850*1500mm
