

SED-600CZJ-A Stainless Steel Pharmaceutical Weighing Machine

Feature of Weighing Machine

1) High-speed, high-precision, high-stability dynamic detection:
High-precision :weighing accuracy:±0.1g

High-speed: the fastest belt speed can reach 70m/min, and the maximum efficiency can reach more than 200 bags/min

High-stability: long-term use accuracy guarantee, no need to calibrate every day, the automatic dynamic zero tracking technology ensures the detection accuracy of aquatic products when the weight of the weighing platform changes.

2) Adopt high-quality, high-reliability parts;

3) Professional HMI design: full-color touch screen, viewing operation is more intuitive and convenient.

4) First-class workmanship and professional mechanical design:

Rack housing is sandblasted stainless steel.

Built-in hinge design, no hygienic dead angle.

Fast installation and removal of belts for easy cleaning and maintenance.

5) Concise user parameter setting: Just enter the product parameters and weighing requirements to complete the parameter setting.

6) Excellent environmental adaptability and stability: Excellent waterproof and dustproof, waterproof grade IP54 optional.

7) Accurate and efficient rejecting mechanism: Provide a variety of rapid rejection mechanisms to meet the rejection of unqualified products under various products and production speeds.

8) User-friendly function:

- Product database, can store 100 kinds of products.
- Multi-level password protection ensures that data cannot be changed by unauthorized persons.
- With data statistics function.
- Support data export, USB interface.

Product Parameters

Model	SED-600CZJ-A
Weighing range	10~600g
Weighing accuracy	±0.1g
Production speed	250pcs/min
Applicable size	W:160mm L:280mm
Weighing table size	50-400mm
Voltage	AC220V
Remark	3 parts (drainage, weighing, rejection)
