NeoTOP x

Adapting to new market requirements
by taking flexible product packaging to new heights

THE NEXT GENERATION NEOTOP

With eminently sustainable, patient-friendly, environmentally aware and evolving concepts which are always matched to our customers current needs, Dividella continues to meet your demands. No other packaging solution is as modular and flexible. In addition to optimal product protection, compact dimensions and easy access, our systems are highly flexible with feeding systems for products of all shapes and sizes.

	range of formats l x w x h in mm	No. of partitions	output packs/min
NeoTOP x		6	40 - 50
NeoTOP x value		4	30 - 35
minimum	60 x 45 x 17		
maximum	260 x 200 x *120		
*up to			

FEATURES AND BENEFITS

→ Extended, flexible, modular platform that can be configured for a wide variety of cartoning applications.

→ Broad array of feeding solutions for syringes, vials, pens, injectors, inhalers, needles, adaptor, blisters, pouches and other devices.

→ Generous carton size range allows single count and multicount products to be packaged on the same machine.

→ World leading machine reliability, efficiency, GMP and ease-of-use.

→ Highest performance - lowest cost of ownership.

→ Rapid changeover can be accomplished in under 20 minutes without tools or setup sheets.
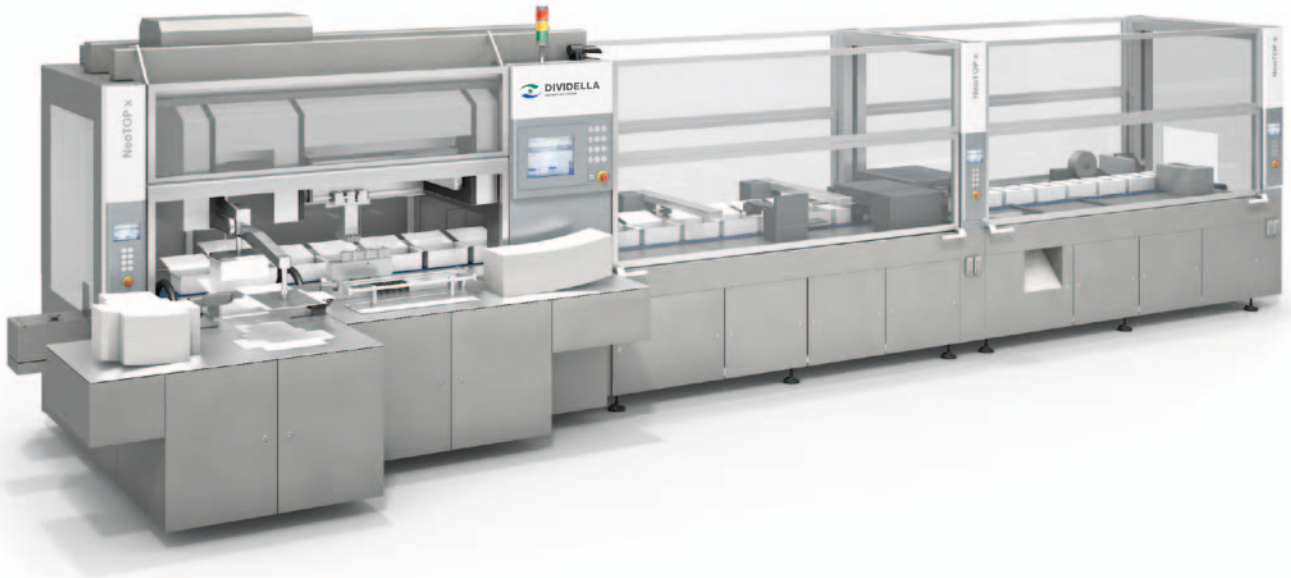

Compact Pen

DispenserBox

Anticipate and take into account future trends with flexible, adaptable packaging and machine solutions – protect your assets.

Technical Highlights

Dividella style digital read outs with position feedback and the option for full automation

Intuitive, Graphical User Interface

Newest Generation Control and Drive System (used throughout Körber Medipak Systems)

White Line Technology

Flat carton blank can be perfectly printed, cured and inspected in one go

Labelling of flat blank allows labelling on all carton sides

White line module can be retrofited

Braille printing

Small Lots – Format Change Over

Vacuum transfer as on all NeoTOP machines:
- No side rails
- No lug chain
- No scratching
- No hidden locations (GMP)

Small, lightweight, robust format parts

Digital read out to support change over
