Automatic Horizontal Labeling Machine SD-WTB

Our automatic horizontal labeling machine is mainly used to handle slender glass and plastic bottles of food, pharmaceuticals, cosmetics, and so on. Both transparent and non-transparent adhesive labels can be used by this kind of labeling machine.

Our SD-WTB computer-control horizontal labeling machine has compact structure, and is easy to operate. Besides, stepless adjustment is also available for this labeler in order to handle different kinds of labels and bottles.

To suit various requirements of different specification bottles, we provide customized components for clients worldwide.

Features of Automatic Horizontal Labeling Machine:

1. Micro-computer automatic control and self-examination are designed to ensure the synchronism of bottles and labels.
2. Its heat code printer can be used in a wide range of applications, and stepless adjusting mode is designed for this printer. It is easy to adjust and operate, and it features high efficiency, small errors, and no noises. In addition, some of its components can be customized.
3. The labeling speed can be as much as 150 BPM according to the label length.
4. The HMI, amp, and PLC control system make it easy to control.
5. This automatic horizontal labeling machine frame is made of stainless steel.
6. Auto-stopping function is possible.
7. It can be used in fields of cosmetics, personal care, household chemicals, food, beverages, nutraceuticals, and pharmaceuticals.

Technical Parameters:

Model	SD-WTB
Productivity (b/min)	80~200
Suitable bottles	Customized
Overall dimensions (length× width × height) (mm)	1600×600×1450
Weight (kg)	180
Total power of motor (w)	280
Power supply	220V / 50~60Hz
