

A520 Semi-auto Round Bottle Labeling Machine

Suitable for wrap-around labeling on round bottles in small quantity and with high labeling precision and quality requirements. Also able to handle bottles with orientation requirements. Manual placement of bottle. Easy operation. High quality output.

- Easy to use.
- Adapt a large range of bottle diameter and height. Easy adjustment between bottle sizes.
- 3-point gripper of bottle ensures proper label alignment.
- Stationary rotation of bottle allows putting two labels around at a time.
- Pneumatic driven label adapting roller engagement for ease of use and consistent labeling effect.
- Orientation sensor for bottles with orientation labeling requirement.

- Servo driven labeling engine ensures speed and precision.
- PLC controlled operation User friendly HMI with program memory.

Features:

Model	A520
Name	Semi-auto Round Bottle Labeling Machine
Capacity	40~60pbm
Weight	100kg
Electricity	220VAC±5% 50Hz 0.8kW
Dimension (for reference)	(L)910 × (W)705 × (H)1310 mm
