

Finished Product Conveyor

Mainly used to undertake packaged products and convey them to weight checking / metal detecting equipment or packing platform.

Main Function & Features:

1. Durable performance, low noise and maintenance-free features.
2. Different heights of baffle plates and borders as well as spacing between the baffle plates per customer's requirement.
3. Adjustable conveying speed.
4. Easy maintenance, easy disassembly and easy cleaning

Technical Parameters:

Contents	Specifications
Body Material	SUS304
Conveyor Type	belt / chain plate
Belt Material	PVC / PP
Power Supply	single / 3 phase 220V/380V 50HZ/60HZ, 0.09KW / 0.25KW / 0.37KW
Conveying Speed	0~12m/min, 0~20m/min, 0~20m/min
Machine Dimension (mm)	per customer's requirement
Conveying Belt Width (mm)	per customer's requirement
