

SCF-10 Semi-Automatic Capsule Filling Machine

- Suitable for low speed production.
- Better weight accuracy by speed adjustable turntable.
- Lower Noise Level by Unique Precision Transmission.
- Precision & Solid Construction for Stable & Long Lasting Operations.
- cGMP Compliance with Cleanliness, Ease of Operation & Maintenance.

Feature:

- Powder feeding quantity adjustable: The powder feeding quantity can be micro adjusted with the operation table. The r.p.m. of the aluminum capsule plate will be shown on the digital electronic indicator.
- After all the empty capsules have been rightly rectified and filled up, the mechanism will stop automatically to reduce the operators working worries.
- Additional manual control has been installed for easy and convenient testing.
- Simple transmission mechanism, easy maintenance and less trouble possibility.
- Beautiful and practical appearance designed, surface plate made of aluminum or stainless steel. Operation controls are all placed on upper side (most accessible.)

Technical Data:

Capacity	10000~12000's/hour
Available Size	standard capsule sizes 00#~5#
Power	1 HP
Vacuum Pump and Motor	2 HP 35kgs
Air Compressor and Motor	1/2 HP 45 kgs
Net Weight	380 kgs
Gross Weight	580 kgs
Dimension	125x80x147 cm (LxWxH)
Export Packing	210x120x179 cm (LxWxH)
