

JXP-12 Automatic Washer

The machine reference to co generic Product's Technology and design principle in abroad, High efficiency in flushing bottle, Adopt continuation water following flushing way bottles automatic overturn. Applicable to the new bottles of flushing and drain, Automatic operate from bottle in until bottle out, Blunt ozone disinfectant Equipped with a sterile compressed air ventilation device, it's the Ideal cleaning equipment for wine cosmetic medicine and food industry.

Main character:

- Simply Adjust easy operate
- Can Standalone or cohesion production line operate
- SUS Bottle clip
- SUS impeller pump
- Main configuration
- Electrical machine: Taiwan
- Pneumatic component: Taiwan AirTAC
- Low-voltage apparatus: France Schneider

Technical parameters:

- object container: column bottle
- bottle range : DIA 50-90mm Height:150-320mm
- quantity of flush head : 12
- produce capacity : 1000-3000b/h
- power : 380V 50HZ
- watts : 1.5KW
- air source : 0.4-0.8Mpa
- water consumption : 1-3T/H
- size : L2440W1000H2000
- weight : 1500kg

we can customize your order if you have special demands
