

Automation Cap Pressing Machine

The automatic cap pressing machine is one kind of packaging machine for the cosmetic, skin care, daily chemical, and food industries to tightening the inner cap. Automation cap pressing machine is designed based on advanced

Foreign technology.

It has advanced design, reasonable structure, all operations are PLC controlled, beautiful appearance, convenient debugging advantages. Reached a certain degree of automatic, and an affordable price. It's widely used in variety of vat lid gland, such as antifreeze barrel lid. It's the best choice for medium and small manufacturers.

Features:

1. We are factory for making the capping machine, we don't save material, the machine is without too much maintenance trouble.
2. The design is more stable to hold the bottle to do pressing.
3. The material of the machine is stainless steel and aluminum alloy, which make the machine to be more durable.
4. Adjusting the machine to meet different bottle size is quite easy.

Application:

The automatic cap pressing machine is widely applied to the food, medicine, beverage, cosmetic, chemical industries, for pressing the inner plugs of the bottles.

Configuration:

Pressing speed	0-40 pcs/minute
Max bottle height	350mm
Voltage	220V50Hz/110V 60Hz
Timer brand	Omron
Motor power	250W
Overall dimension	2000mm×850mm×1460mm
