

Empty Capsule Filling Machine NJP-800

Ruiian Science Machinery And Technology Co., Ltd. has developed the fully automatic capsule filling NJP series for filling powder, pellets and granulates.

Features:

1. Especially suitable for medicine and nutrition.
2. Easy for maintenance and operation.
3. Machine made match with the latest GMP standard.
4. Easy and simple size change with fast replacement and cleaning times.
5. Enlarge the size of dosing Disc; Increasing the powder flowing uniformity in the dosing disc, guaranteed the accurate of filling weight.
6. Add the extra function of Capsule control switch.

Technical Parameters:

Model	NJP-800
Capacity	800 capsules/min
No. of segment bores	6
Suitable for Capsule	00#, 0#, 1#, 2#, 3#, 4#
Total Power	3Kw
Overall Weight	900Kg
Machine Dimension	840mm. (L) x 960mm(W) x 1800mm(H)
Accuracy	$\pm 1\%$ Depending upon the consistency, uniformity & bulk density of powder under the controlled level of humidity
