

Automatic Case Erector

Features:

1. Advanced technology manufacturing, and advanced parts, electrical components and pneumatic components.
2. With a vertical storage, so that you can add carton at any time, be sure the machine keeps running continuously.
3. It is suitable for one kind carton size at one time, when you need to change a different carton box. It takes about 1-2 minute.
4. Reasonable design, synchronous absorb forming, folding bottom and bottom sealing.
5. Its body and part performance precisely and durably, operation process and no vibration, operation stability, long life span, high efficiency.
6. Equipped with blade protection device, avoid operation when he accidentally stabbed
7. It can be used separately, or contact with the production line together

Technical Parameter:

Machine Dimension (L*W*H)	2000*1900*1450
Suitable Carton	L: 200-450 W : 150-400 H : 100-350mm
Suitable Tape	W: 48-60-75mm L:1000 yard
Capacity	600-720 box/h
Height of Work Table	600-720mm
Power Supply	1PH 110V/220V 50Hz/60Hz
Air Supply	6-7kg/cm ²
Net Weight	400 kg
