

NF-60 Automatic Plastic/Laminated Tube Filling & Sealing Machine

NF-60A Automatic tube filling & sealing machine adopts import foreign advanced technique, specially designed according to technology of cosmetics, ointment cream products, machine include automatic tube feeding, heating, sealing, pretreatment system, filling adopt mechanical piston, electrical control system and operation platform system.

Feature:

- No tube no filling.
- Have counting function and point function when reach set amount.
- Error alarm, stopping and alarm in case of door opening, stopping and alarm for too low main air pressure, alarm function for overloading, Emergency stop.
- Automatic print batch number, Automatic tube discharging.
- Automatic tube feeding, automatic benchmarking.
- Automatic filling, tail cutting function for viscous material.
- Main drive system located at the bottom of the machine table, safe and no pollution.
- Filling and sealing part are installed in a semi-closed and no static electricity's transparent cap, and installed in the platform, easy to observation and operation.
- Smooth and flat surface, free of dead corner, being innocuously and non-smell, free of pollution, easy cleaning, and easy maintenance and servicing.
- Compact structure, simple and convenient operation, the machine is applicable to many industries such as medicine, food and daily chemical industry etc.

Technical Parameters:

Operation Speed	30-50/min/max
Filling Range	5-250ml
Suitable Tube Length	50-210mm
Suitable Tube Diameter	13-50mm
Power Supply	50Hz/380V 3P
Main Motor	1.1KW
Whole Machine (L×W×H)	1950×1000×1800mm
Weight	(about) 850Kg
