

## Automatic Liquid Filling Inner Plug Machine AT-GYS-4Y

The machine is integrated with filling, inner plug, lock function. Mainly used for in-line production of large infusions and other small dose solutions, And can be equipped with a labeling machine to form a production line. The structure is compact, easy to maintain and simple operation, full compliance with the latest GMP requirements.

### Features

1. The exterior material is made of 304 stainless steel
2. The filling adopts anti-drip valve body.
3. Stable operation, low noise and accurate filling.
4. High qualified rate of the finished product, low energy consumption.
5. The entire production line can be controlled by stand-alone and interlocked.

### Data

|                           |                     |
|---------------------------|---------------------|
| Applicable specifications | 20-500ml            |
| Production capacity       | 30-50 bottles / min |
| Filling accuracy          | $\leq \pm 1\%$      |
| Power supply              | 380V/50Hz,3Kw       |
| Weight                    | 700Kg               |
| Dimensions (mm)           | 2500 × 1100 × 1600  |
