

Box Cellophane Packaging Wrap Sealer Machine LGB-200A

Box Cellophane Packaging Wrap Machine is a multifunctional packaging machine. After the material enters the top of the packaging machine, the metering component supplies a determined amount into the material passage. Cellophane packaging machine sealing performance, when the product through a series of operations into the sealing system, sealing device can complete the top of the packing seal at the same time, and completed a seal on the bottom of the next bag, formed the two weld in order to complete the packaging process, the sealing process is simple and quick.

Advantages

Cellophane wrap machine is widely used in: food, chemical, pharmaceutical, light industry and other industries.

Easy to use, can automatically complete bag making, metering, blanking, sealing, slitting, counting, printing batch number and other functions (can be configured according to customer requirements).

High efficiency. The machine adopts foreign advanced system, the system is simple and the production speed is fast, can improve the factory production efficiency to the greatest extent. The operation is simple and fast, and the operator can operate more easily and quickly.

Clean and energy saving. The cellophane wrap sealer machine is clean and hygienic, no manual operation, clean and hygienic, save materials, save packaging, save money, and protect the environment.

The side opening protection baffle has a good view and is safe to operate. Using the latest vibrating screen cup adjustment device, cellophane packaging machine can adjust the packaging

capacity at any time during the operation of the machine, reduce material loss and improve work efficiency.

Performance Structure And Features Of Cellophane Packaging Wrap Machine

1. Cellophane wrap machine is of good quality and reasonable price.
2. The performance is stable, no maintenance is needed, and the problem of fully automatic is solved.
3. Easy to operate, easy to learn and easy to operate.
4. The mold form is changeable and the price is low. One machine can pack dozens of specifications of the box.
5. The appearance is lighter and more beautiful, and is not limited by the weight of the cellophane wrap sealer machine on the packaging site.

Technical Data:

Model	LGB-200A
Packing Material	Cellophane(BOPP heat sealing film)
Packaging speed	40-80boxes/min
Packing size	(L)50-120mm(W)20-100mm(H)10-50mm
Power	220V 50HZ
Total power	4.5kw
Shape dimension	2000*790*1550mm
Machine's weight	750Kg
