

ZL-250B Efficient Rotary Granulator

This machine is a new generation of auto dumping rotary granulator, featuring rapid and uniform granulation, with low consumption of energy and high efficiency, the productive capacity being 2 to 3 times that of YKI60A Vibrating Granulator. The most outstanding feature of the machine is it is suitable for granulating semi dry powder with a certain viscosity. It is applicable to granulation of Traditional Chinese Medical Granules, foodstuff; solid drinks, chicken essence and other viscous materials. The machine is GMP compliant, easy to operate, clean and wash. With a high level automation, this machine could be the first choice for the pharmaceutical and foodstuff enterprises.

Technical Specifications

Model	ZL-250B
Power (KW)	3
Diameter of sieve (mm)	250
Capacity (Chinese traditional medical granules) (kg/h)	300-400
Continuous production period	Continuous
Minimum diameter of granulation (mm)	Φ1.5- Φ3
Rotary speed of the crushing knife (r/m)	35-50
Overall dimensions (mm)	1200*700*1100
Weight (kg)	400
