

SPF Semi Auto Powder Filling Machine

SPF semi auto powder filling machine can weight and fill automatically. Electric sensor control weight feedback, we don't limit the package container. It is for the situation that the materials and package weight standards often changed. It has the characteristic of high precision, high speed, great torque and long life. LED simply visual supervisory, easy operator. All parameters can adjust, formula can be memorized, you can memorize 10 at most. Composite type material box, easy to take down for clean and need no tools.

Technical Parameters:

Methods of Measurement	Auger rotation filling traced by weighting feedback
Packing weight	1-500grams (The auger attachment is to be changed)
Packing accuracy	Packing weight \leq 100 g Error \leq \pm 0.5-1g
	Packing weight >100-500g Error \leq \pm 0.5%-1%
Packing speed	20-50bags/min
Volume hopper	30L
Display screen	PLC/Touch screen monitor
Driving	AC servo motor
Power supply	3P 380V 50Hz/60Hz
Total Power	1 KW
Dimension	800x750x1800mm
