

Sugar Filling Machine TH-PM-VFFS-P420

This Sugar filling machine is new design, beautiful appearance, the structure is more reasonable, more advanced technology. Imported PLC computer control system, color touch screen, easy to operate, intuitive and efficient. The imported servo film transport system, imported color code sensor, accurate positioning and the machine performance is remarkable, Sugar filling machine the packing is beautiful. Multiple automatic alarm protection, reducing the maximum loss. Bag-shaped variety, can provide customers with pillow shaped bags, 3side sealing bag, 4 side sealing, stick bag, linking bag, gusseted bag, bag with round hole, bag with euro hole, even bags. Sugar filling machine is automated product delivery, metering, filling.

Sugar filling machine is automatic filling measuring and packaging machine is suitable for various kinds of powder products in different industries. Like food powder, chemicals, medical, agricultural, construction, etc. Its multi-function packing machine enable widely usage to meet different packing requirements.

Advantage

1. Sealing Types

- Back sealing, date printing, vertical pressure seal, spring exhaust, (standard configuration: socket device).

2. Supporting measuring equipment

- Injection pump(liquid packing),
- Screw measuring machine(powder packing),
- Electronic scale(higher class granule packing),
- Measuring cup(low cost granule packing),
- Long tail chain bucket machine(hardware, plastic packing, etc).

3. Supporting feeding equipment

- Z shape elevator
- Dip angle style elevator
- Square/round hopper spiral feede
- Single bucket hoist(matched with measuring cup).
- Finished product conveyor.

Main Feature

1. Servo auger filler metering system for accurate powder product measuring.
2. Additional leak-proof device avoid powder dusty around.
3. Imported PLC with Servo drive and Servo motor enable machine stable performance.
4. 7 inch touch screen with multiple language are available for easy operation.
5. Memory storage function of ten sets parameter for different product package changing.
6. Separate PID temperature control system suits for various kinds of package film sealing.
7. Multi-function roll film structure and sophisticated sealing framework for perfect bag shape forming

Parameter details:

Model	TH-PM-VFFS-P420
Filling capacity	500g - 1000g
Packing film width	300-420mm
Finished pouch size	Length: 30cm
	Width: 20cm
Filling speed	20-40bags/min
Filling weight accuracy	≥99.5%
Power supply	1500W, AC220V, 50Hz
Machine size	120cm*115cm*228cm
Machine weight	520kg
