

Drum Type Left And Right Drive Carton Packing Machine FXJ-6050A

6060 drum type left and right drive carton packing machine adopts sticky tape to seal the carton, which is economical, fast and easy to adjust. It can complete the upper and lower sealing actions at one time, and can also use printing tape, which can improve the product image.

6060 drum type left and right drive carton packing machine uses BOPP tape as the sealing material. 6060 drum type left and right drive carton packing machine can seal the carton in the upper and lower "one" shape at the same time. The motor drive belts on both sides automatically adjust and transport the carton. The carton is fast and stable when sealing. Wide carton. The auxiliary wheels on both sides assist the machine to seal the box without cracking. The height of the table and the width and height of the carton can be adjusted independently, which is simple and practical. Elegant and generous in shape, equipped with blade guard to avoid accidental stabbing during operation. The parts are stable and durable and have a long service life. The fuselage comes with four high-strength brake wheels, which is very convenient for transposition work.

Technical Parameters

Model	FXJ-6050A
Power	220v 50hz, 2*90w
Speed	6m/min
MAX SIZE	W500×H600mm
MIN size	W180×H110mm
Tap size	48-75MM
Dimension	L1660×W740×H1590mm
Weight	145kg
