

Pharmaceutical Oscillating Granulator For Herbal Granule YK-160

The Industrial pharmaceutical double dry roller oscillating Granulator Machine is widely used in pharmaceutical industry, chemical industry, foodstuff industry, powdered drink and so on. It can make wet powder material particles, can also be used to crush the blocked raw material into small granule quickly. When the Pelletizing Machine is running, the rotor speed can be adjusted to control the speed, and the size of the particles can be adjusted by replacing the screen.

Technical Parameters:

- Model No.: YK-160
- Capacity (kg/h): 50-300
- Weight (kg): 450
- Overall size (L×W×H)(mm): 1000*800*1300
