

ZHFM-125 Ultrasonic Sealing Machine

ZHFM-125 ultrasonic tube sealing machine is suitable for plastic and composite tube sealing in toothpaste, cosmetics, pharmaceutical, food and other industries. Such ultrasonic end capping machine is well-designed and its performance is better than similar products.

Advantage

1. The ultrasonic tube sealing machine adopts aluminum alloy structure and stainless steel cover.
2. The independent man-machine operating platform brings a lot of convenience to users.
3. Ultrasonic end capping machine is easy to operate with the adjustable work piece platform.
4. Taiwan cassette mechanism and circuit lines are employed. Besides, micro-computer controller is also used.
5. With large ultrasonic output power, the quality of tubes can be ensured.
6. Our ultrasonic tube sealing machine is equipped with overload protection device, phase separation protection device and power-failure protection device.

Technical Parameters

| | |
|--------------------|-----------------------|
| Power | AC220V±10%, 50Hz/60Hz |
| Max. Power (w) | 1250 |
| Work Power (KHz) | 20 |
| Tube Diameter (mm) | F2-F80 |
| Weight (Kg) | 88 |
