

## ***DXDP60C Automatic Liquid Packaging Machine***

The main engine pump is made of stainless steel, the packaging volume can be steplessly adjusted within the rated range. Controller Chinese display, four-way sealing temperature controlling, reliable photoelectric detection system, automatically printing the batch number or production date, and the package finished cut easy to tear. Semi-fluid machine with mixing device can pack the sticky products with dregs, especially for instant food seasoning packaging.

Applicable material: shampoo, sauce package, vinegar package, bagged pesticides, grease, grease, cosmetics, etc.

Suitable packaging materials: composite film packaging materials

### **Technical parameter:**

| <b>Model</b>                  | <b>DXDP60C</b>               |
|-------------------------------|------------------------------|
| Packing speed(bags/minute)    | 25~55                        |
| Measuring range (ml)          | 1~50, 20~100                 |
| Bag making size(mm)           | length:50~145; width: 30~100 |
| Voltage                       | 380V/50Hz                    |
| Power                         | 1.36Kw                       |
| Outside size (mm)             | 665×770×1580                 |
| Weight(Kg)                    | 185                          |
| Packing material diameter(mm) | 300 max.                     |
