

## **TN Auto Anti-drying labeling machine**

### **Main Application:**

This machine is suitable for labeling on the surface of rectangular plastic bottle. It can finish sending bottle, sending labeled tape, synchronous separating label and printing batch number and so on process. Label outing and labeling use PLC controlling, label outing is droved by inductive step motor, make label more accurately and stably. High production efficiency, fine labeling quality, and has some ability--no bottle, no labeling and sending.

### **Main Technique Parameters:**

1. Production Ability: 3600-10000 bottles/hour
2. Bottle Specification: 100-500ml rectangular plastic bottle
3. Labeled Paper Roll Specification: adopts anti-drying label roll that the diameter less than or equal to 300mm, the maximum width is 120mm, the aperture is 38.5mm.
4. Paper Specification: Length 30-100mm, width: 30-100mm
5. Gross power: 300W, 220 V, 50Hz
6. Overall size: 1900mm x 510mm x 1550mm
