

CFD-L3 Full Automatic Continual Filling Sealing Machine

The high efficiency filling and sealing machine is our latest product, it's complete different from the traditional filling and sealing machine is working step by step, the mould plate of this latest machine go forward continually and stably, it can keep the stuff in the container stable, no wobble or spillage. For the mould plate go forward continually, all the processes are continue, so the capacity can be double as traditional filling and sealing machine. Main features: The machine is consisting of cup-feeding, filling, foil-cover, sensor, sealing, Guiding, cutting, waste foil rewinding, products come out. Sealing by Single float, sealing and cutting by guiding device, it is high accuracy.

MAIN TECHNICAL PARAMETER 主要技术参数	
Capacity 生产效率	17times/min(3 cup/time)
Filing Volume 充填量	50-200ml(adjustable)
Power Supply 使用电力	380V 50HZ 13KW
Air Supply 外接气源	0.5-0.7Mpa 1m ³ /min
Dimension(mm) 外形尺寸	6200×950×1900(L×W×H)
Weight 重量	About 2.8T
