

Semi-Auto Powder Filling Machine For Bottle

All kinds of powder and mixed powder-like material weighing filling, such as: fertilizers, additives, flour, milk powder, coffee powder, washing powder, solid drink, sugar, monosodium glutamate, condiments (such as spicy fresh), natural flavoring, enzymes, feed powder (powder, superfine powder), mixing quantitative powder-like material filling.

Features of Auger Filler:

- Suitable for all kinds of bottles, cans, bags of quantitative filling packaging container is not restricted.
- Filling motor is a stepper motor or servo motor.
- Stirring motor imported from Taiwan, free-noise motor.
- Photoelectric sensor induction signal filling material, can also optional foot switch signal.
- Feedback value can be adjustable, to meet a variety of precision required.
- The filling motor speed can be adjustable, to meet the requirements of various materials.
- All stainless steel, match with feeder enables automatic materials level control.

Functions of Auger Filler:

- Automatic error correction
- Weight out-of-tolerance alarm
- The product count

Technical Parameters of Auger Filler:

Product Name: Hot sale Semi automatic Dry Powder Filling Machine with Auger

Material: Food Grade SUS304 Stainless Steel

Measurement Range: 1-5000g (need to replace a screw attachment)

Filling Accuracy: 1.0

Filling Speed: 1800-7200 bags/hour

Dimensions: 690×060×1900mm

Power: AC 380V 50Hz 0.9Kw
