

PGZ-J Series Washing Filling Capping Machine

Washing, filling and capping machine is mainly applied for the filling of beverage. Integrating with washing, filling and sealing, it realizes full automation in the whole process, suitable for polyester bottle and plastic bottle filling of mineral water and purified water. The bottle types applicable for various parts are easily, conveniently and rapidly adjustable.

Features:

1. 3-in-1 monoblock is composed of rinser, filler and capper
2. It adopts new micro-negative pressure filling, stable and reliable.
3. It is suitable for polyester bottle and plastic bottle filling of juice and tea.
4. Advanced technologies, such as human-machine interface touch-screen and PLC program control are adopted in this machine.
5. All parts that have direct contact with the beverages are made of high quality stainless steel. And the main electrical components are from famous international companies.
6. Human-machine interface touch-screen is adopted in this machine. The liquid level in the tank can be controlled automatically. The filling capping will stop automatically when there is no bottle.

Technical Parameters:

Model		PGZ-J18	PGZ-J24	PGZ-J32
Washing Heads	Piece	18	24	32
Filling Heads	Piece	18	24	32
Capping Heads	Piece	6	8	10
Capacity	BPH	5000	6500	10000
Power	KW	3	4	4.5
Machine Size	mm	2800*2200*2700	3000*2200*2750	3800*2600*2800
