

High Efficiency Automatic Sauce Packing Machine XY-70CJ

The automatic sauce packing machine integrates mechanical and electrical functions, two CPU computer control system, large screen LCD, microcomputer control optical tracking correcting system, high-precision stepper motor, exactly the same position design of each bag, control system of complete synchronization, fixed length, position and speed, automatic fault diagnosis function.

Can choose a ribbon typewriter or stamp making device. This machine bag malting, filling, counting, sealing, cutting a series of actions are done automatically.

Stepless speed regulation, speed regulation process without stopping. Adjust weight without stop.

Features:

1. The stepper motor control (can choose servo motor), bag length is set is cut, don't need to adjust empty, one pace reach the designated position, time-saving province membrane.
2. Man-machine interface, convenient and quick parameter setting.
3. Fault self-diagnosis function, fault shows at a glance.
4. Photoelectric tracking, digital input sealing and cutting position, more accurate in the position of sealing and cutting.
5. Temperature independent PID control, better suited to a variety of packaging materials.
6. Positioning stop function, non-stick knives, do not waste envelope.
7. The transmission system is concise, more reliable, more convenient maintenance.
8. All control by the software implementation, convenient function adjustment and technology upgrade, keep advanced.

Technical data:

Model	XY-70CJ
Capacity	30-60 bags/min
Machine Size	1300×850×1700mm (LxWxH)
Bag Length	30-180mm
Bag Width	30-140mm
Film Width	300mm MAX.
Power	1900 W
Voltage	220VAC/50HZ
Packing material	Paper/the polyethylene, polyester/aluminum foil/polyethylene, nylon/polyethylene,
Net weigh	400kg
