

Powder Filling Machine 3/4 Side Sealing BF-60

This powder bag filling sealing machine is mainly used to pack liquid, cream, powder, granular products: such as shampoo, cream, oil, honey, sauce, sugar, salt, coffee, MSG, seasoning, beans, peanuts, sunflower seeds, grains, nuts, cereals, tea, herbs, washing powder, desiccants, etc. It can finish bag making, filling, 3/4 side seal, coding in one machine.

Paper/PE, PT/PE, PET/AL/PE, BOPP/PE, Tea filter paper and other compound materials can be heat sealed.

Features:

- This machine can automatically complete following work: cup volumetric filler measuring—coding (optional)—bag making—filling—gas injection/exhaust (optional)—sealing—counting.
- Computer/PLC control system, photoelectric tracking, high reliability and intellectualized degree
- Has fault display system, easy to operate and maintain.
- Make punching blade (round/ euro hole) and linked bags device after customer's request.
- Machine body and all food touching part are made by stainless steel (measuring cup material: nylon/stainless steel).

Specification:

Machine model	BF-60
Packing speed	30-80 bags/min
Packing range	5-200ml
Film width	≤ 280mm
Making bag size	L: 50-150mm, W: 15-180mm
Packing accuracy	≤±1%(depends on product)
Power	1.6 KW
Power supply	AC220V, 50/60Hz
Seal type	3/4 sides seal, pillow seal
Net weight	250kg
Machine dimension	600 × 790 × 1800mm
