

6-6-1 Glass Bottle Filling Machine

The 6 heads rinsing filling capping unit machine adopted European traditional filling valves, compact design small foot rint and low consumption, the ideal choice for small and medium capacity breweries the machine got three main parts: rinsing part, filling part and capping part. The machine filling use counter pressure filling method to ensure the beer good quality won't be influenced during the filling step

Technical Parameters:

| | |
|---|-------------------------------------|
| Rated capacity | 500-800BPH |
| Suitable bottle type: Bottle height/Bottle diameter | 150~300mm/ø50~ø85mm |
| Sterile air consumption | 0.4 m ³ /min(0.4~0.6Mpa) |
| Main power | 0.37KW |
| Weight | 1300Kg |
