

Automatic Water Milk Liquid Bottle Filling Packaging Machine YT2G

Our company is a professional filling machinery equipment production company, automatic milk filling machine is a very important automatic liquid filling machine. This machine is characterized by high quality and low price. Customers who have used the machine like it very much.

Automatic liquid packaging machine adopts advanced equipment and technology, which is not only easy to operate but also has a long life. The machine is widely used in chemical industry, medicine, food and other aspects, such as milk, cooking oil and other liquids can be sealed by the machine.

Features:

This machine adopts high quality imported parts, so the machine can run more smoothly and make the machine more durable. In addition, the machine adopts high quality equipment, making the product more sealed, more convenient to preserve the product.

This machine is equipped with a color touch screen display device. Using touch screen makes operation more convenient, can save production time effectively, improve production efficiency. And the machine is made of stainless steel. This makes cleaning machines easier and filling products cleaner.

The machine has good quality assurance, the operation process noise is small, can realize the machine quiet fast production.

Automatic milk filling machine can also be used in conjunction with other equipment. It can be perfectly applied to the production line and can greatly improve the production efficiency of the factory.

Technical Data:

Model	YT2G
Filling Nozzle	2
Capacity	10-30 bottles/min
Filling Accuracy	$\leq \pm 1\%$
Voltage	380V 50Hz
Electric Current	3A
Power	500W
Atmospheric Pressure	0.4—0.6Mpa
Filling Capacity	100-1000ml
