

Automatic Sparkling Water Drinks Bottling Machine DCGF 24-24-8

Automatic Sparkling Water Drinks Bottling Machine is mainly used for carbonated soft drinks filling, soda water drinks filling and sparkling water filling. It combines rinsing, filling and capping 3 functions. It suitable for PET or other plastic bottle. The iso-pressure (iso-barometric) filling technology is adopted enabling it to fill more efficiently and more stably with mor output than the machine of the same

Features

- The bottle out startwheel is helical structure. While changing over bottle size, it is no need to adjust bottle-out conveyor.
- The electric system is from international brand and achieves the national food hygienic standart
- The Carbonated Filling Machine adopts technology of air conveyor direct connect with bottle infeed of screw and conveyor. Easy to change bottle size.
- Adopt neck handling technology to convey bottles, no need to adjust the height of equipment and only need to change some spare parts.
- Washing-filling-capping transfer stably.
- Specially designed stainless steel bottle gripper does not touch the thread parts of bottle neck, avoiding the second contamination.
- High speed and mass flow filling valves.
- Parts contacting liquid are all made of excellent stainless steel or food grade engineering plastic.

Technical Parameter

Model	DCGF 24-24-8
Washing workstation	24
Filling workstation	24
Capping workstation	8
Production capacity(500ml)(B/H)	7000
Bottle specification(mm)	$\Phi=50-95$, H=150-310
Motor power(KW)	5.5
Overall dimension(mm)	3000×2150×2200
Weight(kg)	4500
