

## Automatic 6 Wheels Spindle Capping Machine

VKPAK spindle capping machine is suitable for spindle screw caps, locked caps, and spray caps and so on. The caps can be metal, plastic.

1. We adopt the mode of 'one motor controls one capping wheel', which can ensure the machine to work stably and keep consistent torque under long term working condition.
2. The clamping belts can be adjusted separately, which allow the machine to be suitable for capping bottles with various heights and shapes.
3. If you choose the optional cap guiding system together with the machine, it will then also fit for pump caps.
4. The convenient construction adjustment system is equipped with precise ruler and counter.
5. The mainframe can be lifted and descended automatically by a motor.

### Technical Parameters:

Capacity	0~200b/m (subject to bottles and cap size)	
Bottle and cap diameter	Φ20~120	
Bottle Height	40~350mm	
Spindle capping machine dimension	L1060*W896*H1620mm	
Voltage	AC 220V 50Hz	
Power	1100W	
Weight	500kg	
Cap Feed system	Elevator feeder	Vibrator feeding
Dimension	L880×W1000×H2600mm	L800×W600×H1700mm
