

## *Single Bucket Elevator*

Single bucket elevator is very well suited for a broad range of free-flowing products in the food like almond, dry fruits, Chinese n agriculture, chemical industry.

### **Product Details**

1. One shot lifting of grain material, such as corn, food, fodder and chemical industry, etc.
2. The electromagnetism oscillator make the food, other material transport stable, evenly and fast.
3. The single bucket elevator is used to the packaging system widely.
4. It occupies small room with low running noise, simple operation and easy cleaning.

### **Parameter:**

- Model           Single Bucket elevator
- Bucket Volume:   Customized (minimum 40L, Maximum 100L)
- Machine Structure: Stainless steel or carbon steel
- Production Capacity:   Based on the running speed and bucket volume
- Machine Height:   Customized
- Discharging Height:   Customized
- Hopper Material:   304 stainless steel or carbon steel
- Voltage:       AC220V or three phase 380V, 50hz/60hz
- Power Supply:     0.75kw
