

## *GXF-999 Fully Automatic Sub-packing Machine*

Fully automatic sub-packaging machine can be directly opened the pull button, remove the upper cover to clean the internal walkway, easy and convenient to remove. The product power cord is made of engineering plastic, high insulation, will avoid electric leakage, so that it is easy to run the machine

### **Operating Steps**

1. Remove the bottom screw: The machine is the vibration sub-packaging, please remove the bottom red screw before use;
2. Switch on: The machine is placed steady on the ground, and the power must be connected to the ground wire socket
3. Set the panel parameters: Operation the control panel according to the instructions;
4. Inputting materials: Put the material to be sub-packed into the hopper, and press the start button
5. The automatic sub-packaging complete: The sub-packaging is fast, and effectively improve the work.

### **Product Features**

1. Fully automatic sub-packaging machine high efficiency, high precision, real material, perfect operation
2. Intelligent control, automatic packaging, fast, accurate, high-tech equipment to replace manual;
3. The machine is newly, packaging process automation, simple and efficient operation, exquisite details reflect the quality of craftsmanship;
4. It solves the problem of large manual error, low efficiency and time consumption.

## Application

This machine is applicable to all kinds of materials packaging such like tea, grain, medicine, nuts, seasoning powder, pepper powder, rice, Chinese wolfberry, flour etc.

## Product Parameters:

Product name	Fully automatic sub-packaging machine		
Model	GXF-999	Rated voltage	20V-50HZ
Package speed	6-15bag/min	Power	150W
Product material	Food-grade stainless steel	Function	Sub-packing
Size	37*58*135CM	Complete machine weight	36KG
