

Large Particle Packaging Machine

Features:

- * The perfect combination of high precision and high speed, through computer calculation to instantly select the right combination from the rich weight combination.
- * High-precision digital load cells make accurate measurement instantaneously possible.
- * Chinese/English and other languages LCD display operating system.
- * IP65 grade waterproof and dustproof design. All parts are made of stainless steel, clean and hygienic. The fully sealed design prevents the accumulation of materials and is easy to clean.
- * According to the characteristics of the object to be measured, the opening and closing speed of the hopper door can be finely adjusted to prevent breaking and jamming.
- * Powerful automatic data statistics function, record the total number of bags, qualified rate and single bag error of each batch of production.
- * Strong compatibility, it is directly installed on the top of the packaging machine, and the structure is more compact.
- * Save you a lot of raw material and labor costs.

Technical Parameter:

- Type: ten head computer combination scale
- Net weight: 300Kg;
- Gross weight: 370Kg
- Voltage: 220V;
- Power: 1500W;
- Frequency: 50/60HZ;
- Rated Current: 9A
- Package size (mm): 1400(L)×1130(W)×1120(H)
