

## *Automatic Glass Jar Cans/Bottle Cap Blocking Machine*

Automatic capping machines are used in the food and beverage industry, The glass and metal containers. It applies a multitude of cap styles including dropper caps, chubby gorilla caps, unicorn caps, tamper evident caps, push-pull caps, sports caps and many more. Good sealing, fast capping speed is its advantage.

Automatic capping machine It is the best equipment in food, beverage, pharmaceutical, cosmetic and chemical industries.

Mainly used for a variety of round plastic caps, aluminum caps, iron screw caps capping for different shaped bottle.

### **Main Features**

1. Elegant appearance, smart, capping speed, high pass rate.
2. Modern and unique design, mechanical torque intelligence control, and the operation and regulation is very convenient.
3. Good compatibility, it can be adapted to a variety of bottle caps by adjustment.
4. The capping wheel is made of wear-resistant silicone, which does not hurt the cap
5. With constant torque capping head, the pressure can be easily adjusted.
6. Compact structure, reasonable, can be easily linked into line with other devices.

## Product Specification

Cap Size	Φ15-Φ60mr
Bottle Diameter	Φ35-Φ145mm
Bottle Height	38-200mm
Capping Speed	20~30 Bottles/min
Power	220V 50Hz
Voltage	1.5Kw
Weight	250 Kg
Dimensions	2000 x 700 x 1600mm
