

Liquid Paste Premade Bag Packing Machine D-150/200/250

Features:

1. Fully automatic packing process, no need manual operation.
2. The parts touches with the food are SUS304, according to the standard of GMP.
3. Intelligent sensing, sealed the bags when it is full of food, stops when there is empty, saving material.
4. Adopt with Siemens PLC, Franch brand of Schneider electric components controlled, with steady function and long life.
5. Use Japanese brand of Omron temperature controller to automatically compensate the temperature to seal nicely on the seam.
6. Adopt Taiwan Airtac air cylinders with long working life and easy to change.
7. The feeder devices can be cleaned by water directly, but needs to avoid the electric components.
8. For packing powder, we can add air sucking device or add glass cover to avoid powder flying out.

Technical Parameters:

Model	D-150	D-200	D-250
Bag width	100-150mm	140-200mm	170-250mm
Bag length	120-220mm	150-350mm	150-400mm
Measuring range	Max.800ml	Max.1200ml	Max.2000ml
Packing speed	30-60bags/min	30-60bags/min	30-60bags/min
Power supply	220V 50/60HZ	220V 50/60HZ	220V 50/60HZ
Machine size	1200*900*1300mm	1800*1200*1500mm	2100*1200*1500mm
