

MY-250 Pillow Packing Machine

Widely use to wet towel, non-woven, medical gauze, absorbent cotton, shower cap, hardware, etc.

Function and features:

1. Computer/PLC control, high sensor photoelectric color chart tracing.
2. The bag length need not be set, machine could detect it automatically.
3. High performance machine, simple operation and high packing speed.
4. Gear system besides double frequency converter controller, which making machine simpler operation, high-speed working more stable.
5. Color touch screen, the first third-generation pillow type packing machine in China.

Technical Parameters:

Packing speed	30-220pcs/min
Width of film	90-250mm
Making bag size	L65-160mm; W30-100mm; H5-35mm
Total Power	2.7kw
Power supply	1 Ph. AC220V, 50/60Hz
Machine Size	L4000X W950X H1600(mm)
Net weight	450kg
