

ZS-DPYT2P Double Head Liquid Filling Machine

This semi-automatic filling machine is suitable for filling low viscosity liquid without particle like water, juice, milk, perfume etc. It fills liquid by controlling the filling time and speed, the time and speed are adjustable according to operation. There are two filling nozzles and each nozzle can be controlled separately.

Technical Parameters:

- Machine model:ZS-DPYT2P
- Voltage:AC220V/110V 50-60HZ
- Power:40W*
- Filling range:50-4000ml
- Maximum suction distance:1.5M
- Maximum flow rate:4L / MIN
- Repetitive error smaller than:0.5% (depending on the density of product)
- OD of filling nozzle: OD 6mm
- Machine weight:5kg
