

## *DTF-300 Back Sealing Powder Automatic Packaging Machine*

It adopts screw feeding and convenient metering. It can automatically complete bag making, metering, blanking, sealing, slitting and counting. At the same time, it can configure the printing batch number and other functions according to customer requirements. The advanced microcomputer controller is used to drive the stepping motor to control the length of the bag, and the performance is stable, the adjustment is convenient, and the detection is accurate. The intelligent temperature controller is used, and the PID adjustment ensures that the temperature error range is controlled within 1 °C.

### **Packaging process:**

The packaging process of the automatic powder-packaging machine is completely automated. The whole packaging process does not require manual participation at all, and the automatic powder packaging machine is packed at a very fast speed, so it can bring a large amount of production to the enterprise. The powder-packaging machine only needs a small amount of manual control, because the operation of the machine itself is very simple and very fast, which is derived from the design of the machine itself, and the design is reasonable so that our company is also very convenient when using it.

**Technical Parameters:**

Measurement method	Screw type
Measuring range	0-350ml(0-5ml,5-20ml,20-50ml,30-100ml,80-350ml)
Packing speed	20-40 bags/min,30-50 bags/min,40-60 bags/min
Bag size	W:30-150mm L:30-155mm Can be extended according to customer requirements
Power	1600w
Voltage	380v/220v
Machine weight	250kg
Machine size	1010*730*1780mm
