

## *DXG-10S Automatic Stick Bag Packing Machine*

The integrated processes of bag making, measuring filling, sealing cutting, counting and hot pressing codes can be done automatically.

Packing material include several kinds of heat seal lamination, such as PET/plated AL/PE/, PET/PE, NYON etc.

### **Features:**

- Host, PLC and touch screen control stepper motor speed cutting knife membrane and precision of the machine, ensure.
- The temperature of the independent PID control, fetter for various packing materials, machine practical extension.
- Highly sensitive state-of-the-art adopts photoelectric tracking glances, making the tracing by PLC output is chased after tracking control signals, and tracking of the motor, pacing material in the production process of accurate and timely find error compensation and correct, avoid the waste of packing materials and products.
- All the parameters set in the touch screen operation, Chinese/English display settings, simple operation, convenient maintenance and direct reduced to operating personnel specialized skills required.
- Measuring, bag making machine, filling, sealing, print and output as a whole, and by all the control software realization, high accuracy, high efficiency, no broken material.

**Technical Parameter:**

| <b>Model</b>                      | <b>DXG-10S</b>        |
|-----------------------------------|-----------------------|
| <b>Bag size (mm)</b>              | (L) 50-170 (W) 20-120 |
| <b>Capacity (bags/min)</b>        | 20-70                 |
| <b>Filling range (ml)</b>         | 10-100                |
| <b>Dimension (mm<sup>3</sup>)</b> | 600 x 790 x 1780      |
| <b>Weight (kg)</b>                | 320                   |
| <b>Power</b>                      | 220V,50Hz,1.7kW       |
