

## *GFJX-3A Automatic Aluminum Cream Tube Filling and Sealing Machine*

This machine has the function of tube storage and feeding besides filling, mark-checking, folding and printing. The aluminum tubes feed and locked into the tube-holder automatically and exactly, it is photo-electricity controlled, no tube, no filling. There are 16 pieces stations totally, run automatically. After tube-mark checking, it begins to fill, four-folding, code printing and exist. There is one calculator to record the production capacity per time; you can clear it to Zero for second production. All of the actions are auto control, which improved the production capacity and saving labor cost.

### **Feature**

The filling speed and accuracy is convenient to adjust, good stability. For different diameter tube, just change the tube-holder, easy and economical.

### **Technical parameter**

<b>Model</b>	<b>GFJX-3A</b>
Capacity	1 800-3 000 tubes/min
Voltage	3phase, 380V, 50hz
	(can be provided according to your volt.)
Suitable diameter	Φ10-Φ35 (mm)
Tube holder	12 pieces
Power	1.5kw
Hopper size	30 liters
Filling accuracy	±1%
Weight	250 (Kg)
Dimension	1500×800×2000mm
