

## CLM80 Automatic Gummy Candy Production Line

This is an automatic gummy candy production line designed for gummy candy manufacturers. It is a high-speed, efficient and reliable machine that can produce up to 80 kg of gummy candies per hour. With this machine, you can produce various gummy candies in different shapes and sizes. It is easy to operate and requires minimal maintenance. So if you are looking for a high-quality, automated gummy candy production line, the CLM80 is a perfect choice.

A gummy-making machine typically consists of a series of molds filled with a liquid candy mixture. The molds are then placed into a cooling chamber where the candy mixture solidifies and takes on the shape of the mold. Once the gummies are cooled, they are ejected from the molds and ready to be packaged.

### Feature And Application:

SINOFUDE CLM80 Automatic Gummy Candy Production Line is a stand-alone system capable of full production duties.

It can produce gummies in one or two colors, with a production capacity of 80kgs/h (176lbs/h). This equipment has PLC control and an LED touch panel for easy operation. It is ideal for small to medium production runs.

SINOFUDE CLM80 Automatic Gummy Production Equipment comes with a de-molding device that can help you make many shaped gummies, having a dosing pump for automatic injection of colors and flavors, as well as acids to make you're operate fully automatic.
