

Handheld Plastic Bottle Capping Sealing Machine CM-TCM

This machine is suitable for different kinds of bottle caps like spray bottles, smoking oil bottle caps. The suitable cap size is 20-50mm, It widens the application range, this greater than other capping machine. We can customized if your size not in the standard machine range This automatic capping machine is used for capping different shapes of bottles in cosmetics, food, beverages, pesticides, fertilizers industries.

- Electrical control movement, position control, convenient operation;
- The lock cover a wide range, the bottle cap can be a different shape specifications;
- Torque adjustable, effective protection cap damage, according to the different cap adjust the degree of tightness;
- Suitable for cosmetics, medicines, beverages and other bottle cover for lock

Technical Parameters:

Voltage	can be customized
gas requirement	0.4 ~ 0.6MPa
Power	80W
applicable range	50 ~ 300mm bottle bottle lid
dimensions	467W*5650L*671H (mm)
diameter:	20 ~ 50mm
weight	44KG
capping torque standard value	4 ~ 8kg/cm
